

## Quickmap Software for Server Download Instructions

These instructions describe how to download and copy Quickmap Version 8 files to your server, to allow software to only install from any PC that has network access to the drive on your server that contains all the Quickmap data.

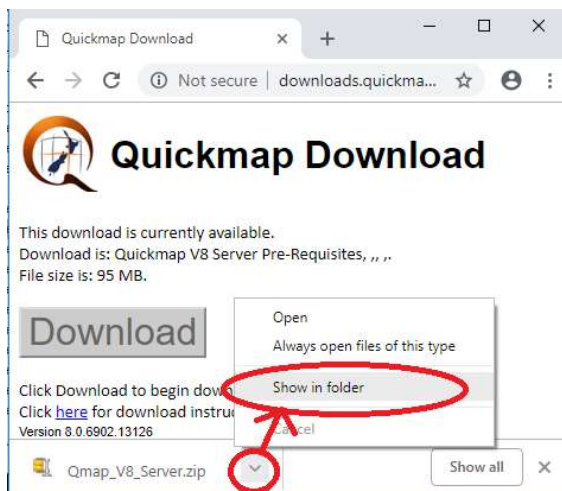

The update can be downloaded from:  
[http://downloads.quickmap.co.nz/URLDownloadHost/downloads/Qmap\\_V8\\_Server](http://downloads.quickmap.co.nz/URLDownloadHost/downloads/Qmap_V8_Server)

After you have clicked on the download link provided to you by Custom Software Limited, or pasted the URL into your web browser, a webpage similar to the screenshot below will be displayed. This screen will tell you what you are going to download, and how big the download is.

Click the Download button.

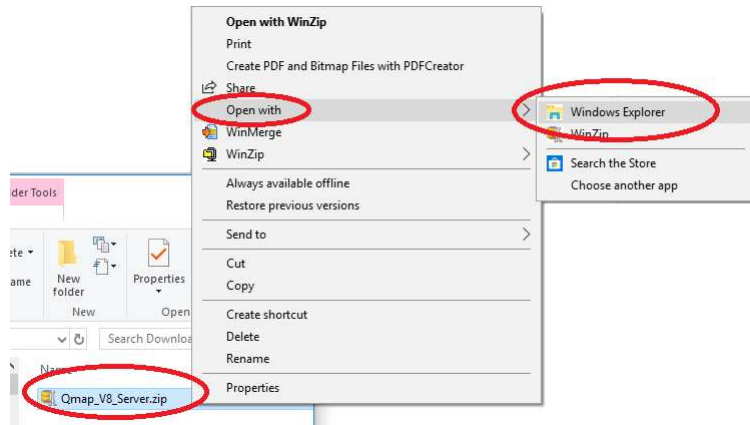

Wait for the download to complete, then select Show in folder.

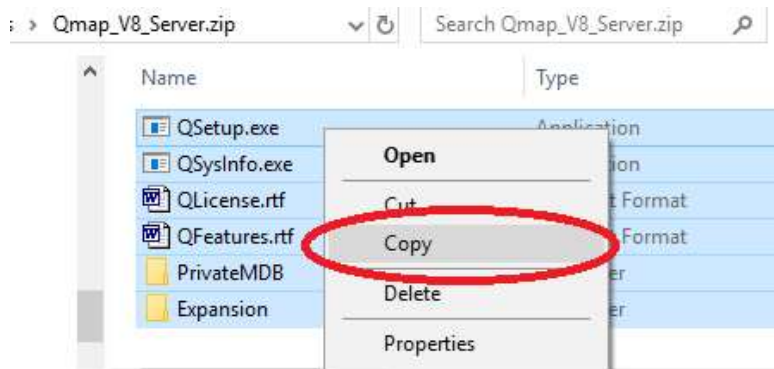

## Copy downloaded data to the Quickmap folder on your server.

Right mouse click on the zip file in the download folder and select *Open with* then select *Windows Explorer*.

Highlight all the files, right mouse click, and then select *Copy* off the menu.

Browse to the Quickmap folder on your server, right mouse click, and select *Paste*.
